## **Introduction**

Canyont is the Visionary and Revolutionary DeFi Stake-earn project which tends to indulge a New Trend in the Crypto Utility Space.

## **What is Canyont ?**

Canyont (CTYN) is a Blockchain-powered platform; built on the BSC network (Multi-chain Network Protocol In-Progress), where Crypto-investors come to earn substantial profits through a staking program. It's simple; the more you stake, the more you earn. Canyont is a Multi-Utility Crypto which will keep-on spreading inside the space, creating new trends for digital money - CTYN.

## **Where will you see CTYN ?**

- ❖ Decentralized Exchanges
- ❖ Centralized Exchanges
- ❖ Fund-raising Platform
- ❖ Multi-Chain Network
- ❖ Canyont Blockchain Network
- ❖ NFTs & Marketplace
- ❖ Metaverse and Web 3.0

## **Our Vision - The Game Changer**

We aspire to build a Strong Passive Income Source for Canyontr tru-Hodlers. It's possible by Community Support and Canyontr's Innovative Token Circulation Cycles which involve Canyontr Exchange, Canyontr DEX, Canyontr Blockchain and so much more.

We see Canyontr as a mode of digital money transfer in the space which will create a trajectory for Crypto Traders and Investors to use CTYN every time they do activity on Crypto Network.

## **Our Mission - The True Warrior**

Our mission is to indulge CTYN Token in every day-to-day trading aspects so that it becomes convenient for the Global Community to make their digital money transactions on Crypto Networks seamlessly.

We are working on Canyontr's Blockchain, once it is successfully developed; it will revolutionize Crypto Space in terms of Lower Gas-fees, Faster Transactions and Highly Secured Decentralized Network.

## **Canyontr Team - The True Leaders**

Every member of Canyontr Team is dedicated towards Canyontr's Growth and Quality.

We are Optimistic and Self-motivated humans.

We respect our Community and Investors.

Be a part of our Telegram Group to get assistance. Admins/Mods will try their best to respond each and every Questioner as soon as possible:)

## **The CTYN Token - The New Ruler in Finance Space**

CTYN will rule the Finance Space, certainly it will always be optimistic for its future and tend to act as a hyper-deflationary cryptocurrency. CTYN will be recognized in every sector of Crypto Utility Space for its unique and

price-efficient performance. CTYN with its native Blockchain will anchor the industry like never before.

With the limited supply of Canyon token (i.e., 201 million) it will turn out to be the most Profitable and Expensive Cryptocurrency in the market. No matter how many UPS & DOWNS Canyon would experience, it will always try its best to maintain a Positive Community Environment and Promises to create a Revolutionizing trend in the space.

### **What we recommend?**

- ◆ Make numerous trades for CTYN token on CEX & DEX and become Canyon tru-Supporter.
- ◆ Make Investments in Canyon and become Canyon tru-Hodler.
- ◆ Maintain Unity, so that market-dumps do not affect CTYN token price.
- ◆ Treat CTYN as a plant, so that it takes care of you in the long run.
- ◆ Each CTYN token in circulation is Precious, so do not lose any.

## **Canyont Infrastructure - The Ultimate Ecosystem**

- ❖ 100% Decentralized
- ❖ Multi-utility cryptocurrency
- ❖ Strong Passive Income
- ❖ Telegram Support
- ❖ Canyont Exchange
- ❖ Canyont DEX
- ❖ Canyont Blockchain
- ❖ NFT Marketplace
- ❖ Multi-chain Network
- ❖ Total Security
- ❖ AI Supported Platform
- ❖ Canyont Fund-raising Platform

## CANYONT USE CASE

### ➤ Canyont Mobile Application (Canyont Exchange)

The Canyont Mobile Application enables a seamless trading experience for its users. It's basically an Exchange, where users can Buy and Sell and Deposit and Withdraw the Cryptocurrencies of their choice. We have designed a user-friendly interface within the app which will make the users prioritize our application for Cryptocurrency - Trading and Investments. The application will be upgraded/integrated on regular basis, so there is NO issue with the New Technologies that will be introduced in digital space with time. Users get the privilege of contacting our 24x7 Customer Support Team for any queries, issues or assistance.

Features that the Canyont Mobile Application support are as follows:

- ✓ Two-factor Authentication
- ✓ Buy & Sell
- ✓ Deposit & Withdraw
- ✓ Token Locking Features
- ✓ Swap Features
- ✓ Advance Trader Chart
- ✓ Private Portfolio
- ✓ Live Market Analysis and so much more.

\Canyont Exchange App is available on Play Store and Apple App Store.

\Canyont Exchange can also be accessed via web portal -

[www.canyont.com](http://www.canyont.com)

➤ **Canyont Cloud Mining**

Talking more about the “use case”, we have some exciting features of mining Canyont tokens. If you are holding more than 500 CTYN tokens in your wallet then Canyont Cloud Mining Feature will be activated. Mining feature allows you to earn CTYN tokens everyday depending upon your wallet balance. You don’t need heavy miners or rigs, just open Canyont Mobile Application and turn on Canyont Cloud Mining feature- let it earn for you. With Canyont Cloud Mining, you become a True Supporter of the project and help Canyont Blockchain Protocol to complete each transaction that is made on the Network. The tokens generated through mining will be used to reduce trading fees.

➤ **Canyont Charity Foundation**

- ◆ Canyont Charity Foundation will donate funds to an organization that helps people with physical disabilities.
- ◆ A part of the funds which will be collected through trading fees, withdraw charges and network charges will be donated directly to charity.
- ◆ In Future, we will be organizing our own Canyont Charity Foundation to help poor people and street dogs with food, shelter, clothes, required medications and much more.

## ➤ **Canyont Blockchain**

### **Introduction to Blockchain Technology -**

Blockchain in simple terms is regarded as the record-keeping technology and has been popular after the advent of Bitcoin. This technology is also linked with banking and investment firms. The process of maintaining the record of information and data in form of databases that are stored electronically on the computer system is called Blockchain. It can also be regarded as a digital ledger. Blockchain is the system of recording and storing information in such a way that it cannot be edited or hacked. Every computer connected to this system has access to the data and information recorded in the Blockchain. It is not managed and controlled by any single person or authority but is decentralized. Thus, the technology is also stated as the distributed ledger system.

### **The Canyont Blockchain Network -**

Just like a Pizza is incomplete without its toppings, our Cryptocurrency (CTYN) is incomplete without its native Blockchain. So we will be launching our own Blockchain Network which will have the cheapest Gas-fees and Fastest Transaction speed. The Canyont Blockchain will have numerous features which will be introduced to our Community once the Protocol is developed successfully. We will release “Canyont Blockchain Litepaper” just before the deployment of Canyont Blockchain.

➤ **Canyont NFTs & NFT Marketplace**

NFTs provide a complete history and proof of ownership for digital assets or any other asset that is represented by a non-fungible token. This functionality enables the creation of unique digital assets and items that anyone can buy or sell freely on an open marketplace.

We will be minting & listing our own NFTs on marketplace, so that our Community can Buy & Sell the NFTs of their choice and make Profits. Our main focus will be on the Authenticity & Quality of NFTs. Canyont NFTs will establish a new trend in the NFT Marketplace. With time, Canyont NFTs will turn out to be a Business of NFT tradings. Once we achieve a Strong Community of Canyont Holders, we will start the process of minting followed by listing Canyont NFTs on marketplace.

Now guess what?

We will launch “Canyont NFT Marketplace”, where people would get the privilege of listing their NFTs on Canyont Blockchain Network at cheapest Gas-fees rate and Fastest Network Protocol. Users will be allowed to list their NFTs on other possible Networks as well. Our Developer Team will integrate the platform in every possible aspects with time, so there is not an issue with the growing technology.

A Neat & Clean User-friendly Interface and Advance Technology will let us win every user’s Heart and Trust.

## Token Details

Token Name	Canyont
Symbol	CTYN
Decimals	18
Network	BSC (Multi-chain Network In-Progress)
Total Supply	201,000,000
Max Supply	201,000,000
Trading Pairs	BNB (BEP-20) and more.

**THANK YOU.  
LOOKING FORWARD TO SERVE YOU.**
